DRY NEEDLING THERAPY CONSENT FORM

Dear Sir/Madam,

Thank you for choosing RVA PHYSICAL THERAPY. Dry Needling Therapy is a valuable

treatment technique in managing chronic pain, acute pain, muscle stiffness and spasm,

edema/ swelling, and painful muscle trigger points. Like any treatment procedure, there is

risk for complications, and while these are uncommon they can occur and must be

appropriately outlined prior to consenting to its use.

Dry Needling uses a thin, flexible, sterile needle to promote muscle relaxation, while

increasing the ability of tissue to heal, and often results in pain relief. Dry Needling

technique uses the same type of needles used in Acupuncture. However, Dry Needling

treatment perspective is based solely on modern physiology, neurology and bio

mechanics, rather than the ancient Traditional Chinese/Asian Theory of the energy, "Chi".

Dry Needling is termed "dry" because at no time will a fluid or medication, be injected into

your body. It therefore can be considered a natural therapy to help manage pain and injury.

Dry Needling may cause minor to moderate increases in muscle soreness and ache for up

to two days. However, improvements in a patient's overall pain state can be expected to

occur within the first 24 hours after treatment. If a needle touches a nerve, vein or artery

and produces pain, bruising, numbness and/or tingling, it can be expected to resolve in a

few days.

All needling procedures have a risk for infection. However, Dry Needling Therapy always

utilizes new, sterile, disposable needles and thorough hand-washing procedures. If you

currently have an; infection, cancer, hepatitis, HIV/AIDS, a pacemaker, are taking blood

thinners and/or immunosuppressant medications (decreasing the strength of the immune

system), then please inform your health care provider prior to beginning treatment.

I have read or have had this form read to me; and I understand the risks involved

with Dry Needling Therapy. I have had the opportunity to ask questions and express

any concerns, of which have been answered to my satisfaction.

I consent to Dry Needling Therapy treatment by my health care provider.
